HIGH SCHOOL ENVIRONMENTAL SCIENCE

State Standards:

Env.1.2, Env1.5, Env1.7, Env.2.3, Env.4.1,
Env.4.2, Env.7.1, Env.7.2, Env.7.3, Env.7.4,
Env.8.2, Env.8.4

Objectives:

- Learn about different kinds of pollutants in our streams, where they come from and the impact on the environment
- Learn how to analyze a water sample to determine pollutant load

Activity:

- Break into small groups
- Each group collects a water sample
- Follow kit instructions
- Compare data and conclude "health" of the stream
