The Big Thirst

I have had several people comment to me in September that the lake is quite low. So, I thought I would check to see if data would support that observation. The United States Geological Survey (USGS) has a [gage station](#) to measure the lake level.

Enjoy a beautiful fall day and take a walk.

Download and print this page to document how many signs of the changing season you see.

2020 Fundraising

In November 2019, your LMEF board set a 2020 fundraising goal of \$135,000. This amount would fully fund all the projects and programs scheduled for the upcoming year.

As you well know, 2020 did not go exactly as planned! However, thanks to your generous gifts, we were still able to move forward with many of our planned projects and tasks.

- New Website
- New Blog
- Programming at Multiple Grade Levels
- Newsletters
- Regular Electronic Updates
- Water Monitoring
- Aquatic Vegetation Monitoring
- Community Outreach

If you have already made your 2020 gift, **THANK YOU!**

We are very close to reaching our goal. If you have not yet made a gift this year, won't you consider doing so?
