Let's Discuss Climate Change Even If We Disagree

I think we can all agree, it is better to clean up after ourselves, and leave the world a little better than we found it.

Happy Earth Day!

April 22nd

Earth Day was founded in 1970 as a day of education about environmental issues.

It is now a global celebration that often extends into Earth Week, a full seven days of events focused on green living and confronting the climate crisis.

PFAS FAQs *by Lilly Center for Lakes & Streams*

If you read human health topics in the news, you may have scrolled past a headline containing words “water pollution” and “forever chemicals,” or the acronym “PFAS.”

Are There PFAS In My Drinking Water?

The Indiana Department of Environmental Management (IDEM) conducted testing for PFAS in Culver in June 2022.

They did not find any verified detections of PFAS in Culver Community or Culver
